REASONS FOR ALLOWANCE

The following is an examiner's statement of reasons for allowance: The prior art of record teaches a transfective liquid crystal display device, having a plurality of pixels, each comprising a liquid crystal layer being sandwiched between a front and a back substrate, a back light, a semi-transparent reflective element, being arranged between the back substrate and the back light, a front polariser, and a driving arrangement for controlling optical properties of the liquid crystal layer, whereby the pixel is subdivided into a reflective pixel part and a transmissive pixel part, characterised in that a cholesteric layer composition is arranged between said liquid crystal layer and the back substrate, said cholesteric layer composition comprising; in said reflective pixel part, a first cholesteric layer composition part for reflecting a desired primary pixel colour. The prior art of record does not teach, in combination with the limitations supra, the limitation "in said transmissive pixel part a second cholesteric layer composition part for reflecting the remaining primary colours, other than said desired primary pixel colour."

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
